# The first annual meeting

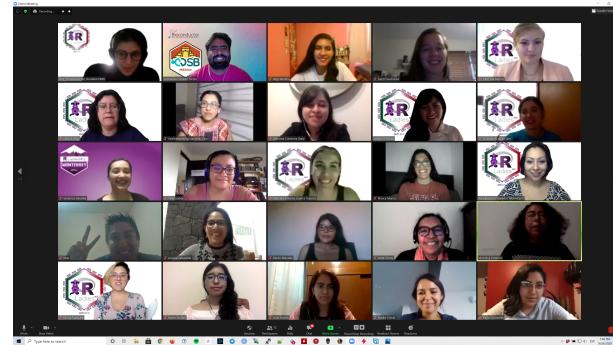

The screenshot shows the R-Ladies MX website. At the top, there's a navigation bar with links to Home, Events, People, Blog, and Code of Conduct. Below the navigation is a search bar and a logo. The main content area features a large image of the R-Ladies Mexico logo, which is a purple hexagon containing a white 'R' and a purple silhouette of a person. To the right of the logo, the text 'R-Ladies México' and 'Community' is displayed. Below this, there are two blue circular icons with white symbols: an envelope and a person.

## Overview

The first R-Ladies chapter in Mexico born in 2017 as part of the growing up community of R-Ladies Global. Three years later, 7 more chapters have been created and almost 3,000 members have added to this amazing community in our country.

This year, we want to strengthen efforts among all chapters across the country and bring them together in the First Annual Meeting R-Ladies Mexico.

### R-Ladies Mexico

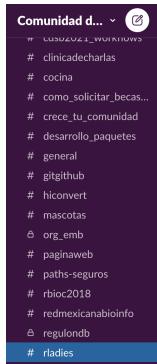

The R community is characterized by promoting a supportive and inclusive environment through established groups such as [Bioconductor](#), [useR](#), [RStudio](#) and [R-Ladies](#). Specifically, R-Ladies chapters have had a great impact on local circles by promoting an inclusive environment in programming. R-Ladies is an organization founded in 2012 with a focus on teaching and empowering women and gender minorities to become more involved in programming. In Mexico, our [first chapter](#) was founded in 2017 by [Teresa Ortiz](#) and [Silvia Gutiérrez](#) in Mexico City. We are delighted that in just three years we have ten chapters in our country!

Coming  
soon...
